## **DETAILED ACTION**

### ***Claim Objections***

Claim 9 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim does not refer back to more than one preceding claim in the alternative.

See MPEP § 608.01(n).

Claims 1 and 8 are objected to because of the following informalities:

Claim 1, line 5, "articulatedly" should be --articulately--.

Claim 8, line 2, "the upper" should be --an upper--.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 5, 6 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 5 recites the limitation "the bearing housing" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 6 recites the limitation "the communicating annular spaces" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 9 recites the limitation "the joint and the tension leg" in line 3. There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 4 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lloyd et al. (3,766,582) in view of Siegfriedsen (US 2003/0151260 A1). Lloyd et al. disclose a tower arrangement that floats in an essentially vertical position, wherein the tower is articulately connected to the seabed and the tower is rotatable about a tower axis of rotation where in the lower part of the tower is provided with a swivel joint 24 design to absorb vertical tensile forces. The tower axis of rotation essentially coincides with the center axis of the tower and the bearing housing 24/25 for the swivel joint is connected to a tensioned anchor leg 11 via freely bendable joint 21. Lloyd et al. further disclose that the tower, its lower part, the swivel joint and the joint are provided with an open passage. Lloyd et al. does not disclose that the tower is for a wind turbine.

Siegfriedsen teaches an offshore wind turbine tower having a machine housing including rotor that is non-rotationally connected to the tower. Since the tower of an offshore wind turbine is essentially an elongated structure that will have another structure mounted to it and Lloyd et al. discloses the essence of an offshore structure, it would have been obvious at the time the invention was made to one of ordinary skill in the art to modify the tower of Lloyd et al., with the teaches of Siegfriedsen, by providing a wind turbine on the upper portion of the tower for the purpose of mounting a wind turbine in an offshore environment.

## **CONCLUSION**

### ***Allowable Subject Matter***

Claims 3, 7, 8 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 5 and 6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
